

AMBER Helps Research

AMBER continues to support the 'Sounds of Intent' research project. This worthwhile project has been investigating and promoting the musical development of children and young people with severe, or profound and multiple learning difficulties, particularly those who are blind or partially sighted.

A project website is currently under development, which will provide a range of support materials and advice for teachers in special schools, as well as parents and teaching assistants.

You can also donate money to go towards this fantastic project.
